Stedman's Medical Dictionary 27th Edition

dermatophytosis (der'ma-to-fi-to'sis)

An infection of the hair, skin, or nails caused by any one of the dermatophytes. The lesions may occur at any site on the body and, on the skin, are characterized by erythema, small papular vesicles, fissures, and scaling. Common sites of infection are the feet (tinea pedis), nails (onychomycosis), and scalp (tinea capitis).
Cf.: dermatomycosis.
